DETAILED ACTION

I. In light of amendment filed 12/02/03, rejection of record will not be maintained.

Applicant's arguments with respect to claims 24-26 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 24-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Yokoyama et al (EP 823 994; 2/18/98) or Yokoyama et al (JP 10324602; 12/08/98). Yokoyama teaches a method of applying 9-hydroxy-10-oxo-12(Z),15(Z)-octadecadienoic acid (ketol fatty acid) to flowers (plants) to promote budding. See abstract, page 2 line 35 – page 3 line 45. It is inherent that the application of the ketol fatty acid to the flowers would also enhance the flowers' tolerance to stress.

Allowable Subject Matter

Claims 27-32 are allowable. The prior art does not teach or suggest the application of a ketol fatty acid to a fungus to promote the growth of the fungus.
